🎯 "USER CREDITS & BUSINESS AD CREDIT REIMBURSEMENT" SYSTEM

✅ Objective

To create a system where:

- The **user uses their credits** to receive **real in-store discounts**
- The **business applies the discount**, and receives the **same amount in advertising credits**
- All of this happens **automatically and transparently**, validated by **uploading a receipt**

🧩 KEY COMPONENTS

1. User Wallet (PianoFesta Credits)

Each user has a **digital wallet** in the app: *"PianoFesta Credits"*

Credits can be earned by:

- **Inviting friends via referral link** (e.g., 1 friend = €1)
- **Bonus:** Every 3 new friends = €2 extra credit

> Credits are **non-transferable** and **cannot be converted into money**, but can be used for a **maximum €30 discount per event provider**

---

2. Businesses Participating in the Program

During registration or from their dashboard, a business can activate the option:
"Accept PianoFesta Credits"

This allows them to:

- **Receive users** who want to apply in-store discounts using credits
- In return, receive **the same amount in ad credits**

Advertising credits can be used for:

- **Sponsored profile listings (business cards)**
- **Sponsored events**
- **Sponsored job offers**

🔄 IN-STORE FLOW – USER SIDE

📍 1. At the counter

The user tells the provider:

> "I'd like to use my PianoFesta credits for a €30 discount."

The business applies the discount directly.

📍 2. In the PianoFesta App

User navigates to:
→ **Wallet > Use credits in store**

Fills in:

- 🔍 Selects the business (via search or history)
- 💸 Enters the amount of credits to use (max €30)
- 📎 Uploads receipt (photo or PDF)
- ✅ Checks the declaration:

  [✔️] "I declare I received a €30 discount from [BUSINESS NAME], thanks to PianoFesta credits."

👉 Clicks [Confirm and Send]

⚡ AUTOMATED AFTER SUBMISSION

✅ Auto-approval:

- The business **automatically receives** the same amount in **advertising credits**
- **No SuperAdmin intervention required**
- The user sees a confirmation:

  > "Thank you! Your credits have been used successfully. The business has received the ad credits."

🧠 BACKEND & CONTROL LOGIC

Security:

- Only businesses with the flag **"Accepts PianoFesta Credits"** can receive ad credits
- A **maximum of €30** per event can be applied
- Each request logs:
  - User ID
  - Business ID
  - Date & Time
  - Receipt image
  - Credits deducted from user
  - Credits granted to business

Accessible from: ✅ Admin Dashboard
✅ Business Dashboard (credit history)
✅ User Wallet (credit usage history)

✨ REAL-LIFE EXAMPLE – FLOW

Luca goes to eat at an event venue.
The bill is €250. He asks for a €30 discount using his credits.
The business accepts and applies the discount.
Luca uploads the receipt and confirms via app.
The business instantly receives €30 in ad credits.
Luca is happy. The business gets a real customer and visibility.
PianoFesta creates a win–win ecosystem.

📈 BENEFITS

User	Business	PianoFesta
Actually saves	Gains real clients	Doesn't handle any money
Feels rewarded	Earns visibility	Strong brand engagement
Invites friends	Attracts new users	More credit use & upgrades

---

🔄 UPDATED FLOW

📍 Step 3 – Credit Use Confirmation + Auto Tracking

User applies credits, uploads receipt, and confirms.
App **automatically credits the business**.

Now also added:

- 📊 "Total Savings" tracker for the user
- 📈 "Credits Earned from Discounts" total for the business

👤 USER – Updated Wallet

📌 New visible sections:

- Available credits: €25
- Credits used so far: €75
- Total savings with PianoFesta: €75

> "You've saved €75 using PianoFesta credits at participating businesses."

➕ Plus:
A "History" section listing all businesses where credits were used:

- Date
- Amount
- Event type
- City

🏢 BUSINESS – Updated Dashboard

📌 New visible metrics:

- Available ad credits: €240
- Credits earned through applied discounts: €90

> "You've received €90 in ad credits by applying real discounts to clients via PianoFesta."

➕ Plus:
A list of transactions with:

- Date
- User name
- Event

- Discount amount
- Credits received

🛑 ANTI-ABUSE SYSTEM – “Invite Real Friends!”

Alert message (in-app):
🚫 Only invite **real friends**! Fake or inactive accounts will be removed and **you may lose earned credits**.
👉 We verify account activity. **Quality over quantity!**

Fraud prevention logic:

Valid invites must:

- Use a **real email** (no temp-mail)
- Complete full registration
- Visit at least **one supplier or event profile**
- If inactive after X days → invite is invalid

➕ Bonus idea: show a ✅ next to valid friends

🖼️ HOW TO DISPLAY IT IN-APP (Simplified UX)

Title: “Invite friends and save!”

👥 Friends invited: 6
💸 Credits earned: €10
🎁 Next bonus at: 9 friends (3 more to go)
📤 Share your link: [copy it]

📊 Invite history:

- Andrea ✅ → +€1
- Luca ✅ → +€1
- Mattia ✅ → +€3 bonus unlocked

- Luca_77 ❌ → Invalid (inactive account)

🧠 TIPS & BEST PRACTICES

✅ **To increase engagement**:

- Show progress bar: “You’re about to unlock €5 extra!”
- Add badges like: “Referral Star – You’ve invited 10 friends!”
- Motivating notifications:

  “Just 1 more friend to unlock €5 extra!”

✅ **To make it social**: Add sharing buttons:

- 📲 Send via WhatsApp
- 📧 Send via email
- 📤 Share on social media

✅ **For easier backend management**: System tracks:

- Number of invites
- Who was validated
- Credits assigned
- Fraud attempts
